

## Statement of product lines or products including recycled content

VS America in its continual effort to address environmental concerns, offers many products which include recycled and/or post consumer recycled materials.

The products and or lines are:

- **Panto Move series (with plastic seat shells)**
- **Panto Swing series (with plastic seat shells)**

Plastic seat shells contain some content of scrap from polypropylene parts that have been recycled back into the manufacturing process

- **Uno-M Desk series, Step by Step and the classic skid table (with LignoDur tops)**

LignoDur table tops are made using surplus wood, sawdust and wood shavings that are recycled back into the production process. This patented process compresses wood scrap at high temperatures. The surface is noted for its durability and resistance to breaking, cracking, deforming and delaminating

- **All products with steel parts**

Tubular steel parts are extensively recycled back into production for new steel parts
